Servoperl royal

Flexible

From 1–10 mm grout joint. Superior resistance against built-up of microorganisms and mold colonies. Greater resistance against power

washers. Higher resistance against household chemical cleaners. Efflorescence free. Servoperl-effect, water and dirt repellent properties.

Okapox royal

Solvent-free, colored epoxy based grout and adhesive mortar for high stressed, acid-resistant installation and grouting of ceramic tiles, corresponding natural stone coverings,

glass mosaic, in the light acid based environment, in swimming pool and therapy pools.

Servoperl royal

flexible, water and
dirt-repellent grout

- universal formula for floors, walls
- suitable for interior, exterior applications
- true mold/mildew resistance
- household Chemical Cleaners Resistant
- no sealing required
- stain resistant and water repellent
- no haze*
- efflorescence free, accurate colour consistency
- based on high-quality alumina cement
- high compressive strength
- resistant to power washers**
- zero VOCs
- smooth and easy-to-use cementitious product
- suitable for residential, commercial and chlorine-based pools***
- suitable for heated floors
- grout joints from 1/32"–3/8" (1–10 mm)
- ready for light foot traffic and exposure to rain in 6 hours

* Follow additional information located in Kiesel technical data sheet

** With the V-fin and up to maximum 1350 PSI

*** Follow additional guidelines located in the technical data sheet and local/national swimming pool specifications
